

- 1 Adjust the fitting power cable and suspension wires to the correct length
- 2 Fasten the ceiling canopy mounting bracket to the ceiling
- 3 Wire the fitting to 240V supply using connectors. (ENSURE THE CIRCUIT IS TURNED TO THE OFF POSITION)
- 4 Attach the ceiling canopy to the ceiling canopy bracket using the screws provided.
- 5 Test the fitting.

IF FITTING IS DALI CONTROLLED THE DRIVER WILL BE STORED REMOTELY. IN THIS CASE, **DO NOT** ATTACH THE POWER CABLE DIRECTLY TO 240V
